Forecast for Thursday 15 Aug 2024

Weather: Low cloud developing during the early hours, with outbreaks of drizzle and light rain occurring during the morning. More persistent and heavier rain arriving late afternoon and early evening, clearing towards midnight. Feeling humid.

Chance of cloud-free hill tops above 600m: 70%, becoming 30% by dawn, then becoming 80% towards midnight.

Low cloud and visibility: Extensive cloud above 400-600m for much of the day. Any occasional breaks are most possible in the east. Visibility will often be poor or very poor in the rain and low cloud, though may temporarily improve to good during the drier periods.

Meteorologist's View

Paths are likely to be slippery and strong winds will destabilise your footing further. Ensure to have appropriate waterproofs and footwear.
